Electromagnetic induction was
first discovered by Michael
Faraday, who made his discovery
public in 1831. It was discovered
independently by Joseph Henry in
1832.. In Faraday's first
experimental demonstration
(August 29, 1831), he wrapped
two wires around opposite sides

impedance matching is the
practice of designing the input
impedance of an electrical load or
the output impedance of its
corresponding signal source to
maximize the power transfer or
minimize signal reflection from
