Agarose - Wikipedia - Histone H3 is one of the five main histone proteins involved in the structure of chromatin in eukaryotic cells. Featuring a main globular domain and a long N-terminal tail, H3 is involved with the structure of the nucleosomes of the 'beads on a string' structure. Histone H3 - Wikipedia - Las histonas son proteínas básicas, de baja masa molecular, y están muy conservadas (en términos evolutivos) entre los eucariontes así como en algunos procariontes. ... Histona - Wikipedia, la enciclopedia libre -
